Axel *Derobert*

DATA ANALYST · LYON

Curious by nature, analytical by training

PROFILE

Junior Data Analyst completing my training, I turn raw data into actionable insights using Python, Power BI and SQL. Through 13 hands-on projects, I've built solid skills in data cleaning, analysis, machine learning and dashboard design, with an eye for clear visualisations. Each project simulated a real business scenario, allowing me to develop practical skills that are directly transferable to a company environment. My international work experience and bilingual skills give me adaptability in multicultural teams.

I enjoy digging into a dataset until it tells a useful story. I'm looking for a 2026 internship where I can put these skills to work on exciting, meaningful projects and keep growing alongside experienced analysts.

WORK EXPERIENCE

Sales Advisor, Flooring & Bathroom Department

2022 – 2025

Leroy Merlin · Vourles, France

- Advised customers and built tailored project quotes backed by in-depth product knowledge
- Planned commercial operations and in-store displays
- Managed after-sales service, deliveries and installation services
- Tracked pricing and price trends across the department
- Oversaw stock levels and reordering
- Drove sales growth and hit departmental targets

Store Manager

2021 – 2022

Helias Frogg · Amsterdam, Netherlands

- Analysed daily financial reports and kept the store's accounts
- Recruited and fully trained a team of 3 sales staff, aligned with company strategy
- Handled incoming deliveries and organised new product lines
- Supervised daily operations, customer service and store standards

General Manager

2017 – 2019

The Raw Guys · Sydney, Australia

- Managed weekly stock and supplier relationships
- Maintained a ~300-customer database, from order intake to delivery
- Led a team of up to 4 employees
- Planned delivery rounds and prepared orders
- Supervised daily production in line with hygiene standards
- Monitored daily takings with close attention to detail

DATA ANALYST · LYON

DATA PROJECTS

Completed as part of my Data Analyst training · case studies on axeldrtdata.github.io

Banknote Authentication Model
`Python · scikit-learn`

Compared four models (k-means, random forest, KNN, logistic regression) to detect fake banknotes from six measurements; the best one became a ready-to-use script.

Airbnb Investment Dashboard
`Tableau · Python · Pandas`

Three-page Tableau Public dashboard taking an investor from the global market to a single neighbourhood, built on 478,000 cleaned listings in 16 countries.

Chicken Export Market Study
`Python · Pandas · scikit-learn`

PESTEL indicators for 164 countries, PCA, then k-means and hierarchical clustering to recommend the most promising export markets to a French chicken producer.

Student Demographics Pipeline
`SQL · dbt · Snowflake`

dbt and Snowflake pipeline that cleans, pseudonymises (SHA-256) and enriches four years of OpenClassrooms enrolments with INSEE data, checked by 47 data tests.

Project Portfolio Dashboard
`Power BI · DAX`

Dashboard tracking 104 IT and marketing projects in 52 countries on cost, schedule and deliverables, with row-level security for three management levels.

Wine Shop Stock Analysis & AI Audit
`Python · Pandas · pandera · Claude · Gemini`

Stock and sales analysis of 713 products, then an audit of my own notebook with Claude and Gemini; pipeline rebuilt with 10 pandera rules.

Online Bookstore Sales Analysis
`Python · Pandas · SciPy`

Revenue trends, tops and flops, customer concentration (Lorenz curve) and five statistical tests (chi-squared, Spearman, Kruskal-Wallis, ANOVA) per customer.

French Property Market Database
`SQL · SQLite`

Data dictionary and normalised four-table schema built from 34,000 property sales, INSEE and geographic data, then twelve business questions in SQL.

Global Food Security Study
`Python · Pandas · Matplotlib`

Public-health study for the FAO on four datasets: 535 million people undernourished, while the calories available worldwide could feed 8.8 billion.

Home Insurance Database
`SQL · SQLite`

SQLite database of 30,335 home insurance contracts, then twelve business questions in SQL: where customers live, what they insure, how much they pay.

TECHNICAL SKILLS

`Python` `SQL` `DAX` `Pandas` `NumPy` `scikit-learn` `SciPy` `Plotly` `Seaborn` `Matplotlib` `Power BI` `Tableau` `dbt` `Snowflake` `SQLite` `Excel` `Git` `VS Code` `Jupyter`

Languages · libraries · tools

METHODS

- Machine learning: clustering and classification
- Statistical testing
- Data cleaning and data modelling
- Dashboard design

SOFT SKILLS

Critical thinking · Effective communication · Teamwork · Time management · Data storytelling · Attention to detail · Problem-solving

OFF-SCREEN

Music
Listening to it and making it

Sport
Football, on the pitch and in the stats

Travel
Discovering new places, a habit my many trips left me with.
