

AXEL DEROBERT

DATA ANALYST

PROFILE

Junior Data Analyst completing my training, I turn raw data into actionable insights using Python, Power BI and SQL. Through 13 hands-on projects, I've built solid skills in data cleaning, analysis, machine learning and dashboard design, with an eye for clear visualisations. Each project simulated a real business scenario allowing me to develop practical skills that are directly transferable to a company environment. My international work experience and bilingual skills give me adaptability in multicultural teams.

I enjoy digging into a dataset until it tells a useful story. I'm looking for a 2026 internship where I can put these skills to work on exciting, meaningful projects and keep growing alongside experienced analysts

WORK EXPERIENCE

Leroy Merlin - Vourles (France)

2022 - 2025

Sales Advisor, Flooring & Bathroom Department

- Advise customers and build tailored project quotes backed by in-depth product knowledge
- Plan commercial operations and in-store displays
- Manage after-sales service, deliveries and installation services
- Track pricing and price trends across the department
- Oversee stock levels and reordering
- Drive sales growth and hit departmental targets

Helias Frogg - Amsterdam (Netherlands)

2021 - 2022

Store manager

- Analysed daily financial reports and kept the store's accounts
- Recruited and fully trained a team of 3 sales staff, aligned with company strategy
- Handled incoming deliveries and organised new product lines
- Supervised daily operations, customer service and store standards

The Raw Guys - Sydney (Australia)

2017 - 2019

General manager

- Managed weekly stock and supplier relationships
- Maintained a ~300-customer database, from order intake to delivery
- Led a team of up to 4 employees
- Planned delivery rounds and prepared orders
- Supervised daily production in line with hygiene standards
- Monitored daily takings with close attention to detail

Malmö, 214 28, Sweden

Driving licence - Open to relocation
national / international

EDUCATION

2025 - Ongoing

OPENCLASSROOMS

- Data Analyst diploma RNCP level 6,
Bachelor's degree equivalent

2017

TORRENS UNIVERSITY - SYDNEY

- English for Academic Purposes (EAP)

2011 - 2014

HIGH SCHOOL RENÉ DESCARTES

- High school diploma - Economics &
Social Sciences

LANGUAGES

- French - Native
- English - Fluent
- Spanish - Notions
- Swedish - Notions

AXEL DEROBERT

DATA ANALYST

DATA PROJECTS

Completed as part of my Data Analyst Training

Banknote Authentication Model - Python (scikit-learn)

Compared several algorithms (K-means, Random Forest, KNN, logistic regression) and selected the best-performing model to classify genuine vs. counterfeit banknotes from their physical measurements

Chicken export market study - Python (Pandas, scikit-learn)

Gathered country indicators through a PESTEL analysis, applied PCA for dimensionality reduction, then clustered markets (K-means, hierarchical clustering) to recommend the most promising export targets for a French chicken producer

Wine & Spirits E-commerce Analysis - Python (Pandas)

Ran a full sales analysis of a 700+ product catalogue (Pareto 80-20, stock rotation, margins, correlation, heatmap) to surface actionable insights on top performers and inventory

Global Food Security Study - Python (Pandas, Plotly)

Analysed FAO data on undernourishment and food availability across countries to map and visualise world hunger patterns.

Project Portfolio Dashboard - Power BI

Built an interactive multi-page dashboard tracking 104 IT & Marketing projects across 52 countries on cost, schedule and deliverable KPIs, with a star-schema data model, synced slicers and row-level security for three management levels

Online Bookstore Sales Analysis - Python (Pandas, SciPy)

Analysed sales and customer behaviour for an online bookstore - revenue trends, top/underperforming titles, customer segmentation (Lorenz curve) and statistical tests (Spearman, Kruskal-Wallis, ANOVA) to identify significant relationships between variables and guide commercial decisions

TECHNICAL SKILLS

- Python - Pandas, NumPy, Plotly, Seaborn, Matplotlib, scikit-learn
- Power BI
- SQL
- Excel
- Machine Learning (clustering & classification)
- Visual Code Studio
- Jupyter

SOFT SKILLS

- Critical Thinking
- Effective Communication
- Teamwork
- Time Management
- Data Storytelling
- Attention to Detail
- Problem- Solving
